Elastobinder

ELASTIC BINDER

The Elastobinder has been specially developed for (fully automatic) bundling of light products with one elastic, the Strepper®. The advantages of this bundling method are: it has a closed form (knots are no longer needed), the elastic does not deform the product, it leaves no damage and with one size Strepper® both large and small products can be bundled. The Elastobinder® can be used horizontally and vertically. Product import is done by hand or by means of a conveyor belt or turntable.

Advantages:

- Horizontal and vertical bundling
- Fast, reliable and cost-saving
- For products with irregular shapes
- Max. 45 cycles per minute
- Can be integrated in an automatic line
- Environmentally friendly, elastic is recyclable

Options:

- Automatic label unit
